

# CLEAN ENERGY COMMUNITIES & CLIMATE SMART COMMUNITIES CERTIFICATION

**Climate Smart Communities**

The **NYSERDA Clean Energy Communities (CEC) program** (<https://www.nyserdera.ny.gov/cec>) is an initiative that helps local governments reduce energy consumption and drive clean energy use in their communities. The **Climate Smart Communities (CSC) Certification program** is an interagency initiative administered by the DEC that provides a comprehensive framework for local governments to lead community action to reduce greenhouse gas (GHG) emissions and adapt to climate change.

The two programs are complementary. Both require applicants to document completion of specific actions in order to earn a designation. As detailed in the table below, all of the CEC high-impact actions satisfy the requirements of one or more CSC certification actions. Local governments that complete any of the CEC high-impact actions are encouraged to submit for points under the related CSC certification actions.
